## How much the borrower pays for this insurance

Premiums are calculated on a loan-by-loan basis. They are calculated separately for each applicant for the specific amount requested and added together for a total premium amount. Monthly insurance premiums are based on the rate tables below and adjusted to match your loan payment frequency plus applicable provincial sales taxes and are included as part of the loan payment.

For all loan insurance coverage types, a change in the applicant's smoking status may affect insurance premiums.

### Reducing balance Insurance

- Premiums are charged in advance and are calculated using the approved insurance amount divided by 1,000 and multiplied by the appropriate rate from the reducing balance insurance rate table as determined by your age on the date you signed the Application.
- Your premium rate remains the same for the life of the loan.
- Joint rates are calculated as follows: 2 people is 1.5 times the highest rate; 3 people is 1.65 times the highest rate; 4 people is 2 times the highest rate.
